CAREER OBJECTIVE

Motivated and enthusiastic 3rd year Computer Science & Engineering student with a strong academic background and hands-on experience in building scalable web applications using Python, Flask, and MySQL. Skilled in RESTful API development, database optimization, and cloud management. Seeking an opportunity to apply technical skills, enhance professional expertise, and contribute to organizational success.

TECHNICAL SKILLS

Programming Languages: C, Python, PHP, Core Java

Libraries/Frameworks: Flask, JavaScript, jQuery, Basic React.js, Bootstrap, CSS, HTML

Tools/Platforms: RESTful APIs, Cloudflare CDN, Git, MilesWeb, Streamlit, Netlify, Vercel, Clever Cloud, Render

Databases: MySQL, PostgreSQL, Basic MongoDB

WORK EXPERIENCE

Edusaint

Oct 2025 – Present

Web Developer Intern

Brahmapur, Full-Time

- Developed the backend for the live project of the company using **Flask**, improving API response time by 30% and handling 1000+ user requests daily.
- Collaborated with the Flutter development team by designing and implementing **RESTful APIs** to ensure seamless integration between the mobile app and backend services.
- Managed application data using **MySQL**, including database design and query optimization.
- Implemented **Cloudflare** CDN to improve website performance and caching.
- Integrated frontend modules provided by the development team with backend services to ensure smooth functionality.
- Deployed and maintained the application on **MilesWeb cloud**, monitoring performance and ensuring system availability.

PROJECTS

Byte-Sized Learning App

- Developed backend services using **Python, Flask**, delivering structured educational content.
- Designed and implemented **RESTful APIs** for user **authentication, authorization** and course access.
- Optimized **MySQL** database queries to improve performance and reduce response time.
- Reduced API response time by 20–30% through optimization.
- Followed modular coding practices to improve code maintainability and scalability.

Attendance Management System

- Developed a web-based Attendance Management System using **PHP, HTML, CSS, JavaScript, and MySQL** to automate student attendance tracking.
- Designed role-based modules (**Dean, Department Office, HOD, Teacher, Student**) with secure authentication and session management.
- Built dashboards for attendance monitoring, reporting, and analysis.
- Built **CRUD** operations for managing student records and attendance data.
- Designed the system to handle large-scale user data (approx. 2000 users) efficiently.

EDUCATION

Rajiv Gandhi University of Knowledge Technologies - Nuzvid

Sept 2023 – Present

Bachelor of Technology in Computer Science & Engineering (Expected May 2027)

CGPA: 9.1

CERTIFICATIONS

- Cloud Computing - IIT Kharagpur
- Artificial Intelligence: Search Methods for Problem Solving - IIT Madras

ACHIEVEMENTS

- My project, Attendance Management System is going to be hosted on the **RGUKT Nuzvid campus server** for real-time use.
- Secured two paid internships in 3rd-year, 1st semester of my Engineering.
- Successfully working on multiple projects showcasing hands-on technical proficiency
